6K/8K Series

Gas Fireplace Guide

Bring a Room Together

The 6K/8K Series is designed around the idea that a great fireplace needs to do more than one thing well. Heat, ambiance, design, and technology are considered together – not traded off. That balance is what makes this series a best-seller, and it's built into every model.

What Comes Standard

Two Sizes: 36" or 42" width

Effortless Operation: Electronic ignition, smart-home options, and a range of optional upgrades that give you total control of the fire

Design Flexibility: Multiple fronts, interior panels and log styles to match your home's aesthetic

Two Ways to Create Your Look

Choose a Design Package: Our curated Design Packages combine fireplace fronts, interiors and log sets, simplifying the selection process and guaranteeing your choice is cohesive and on trend. (Page 5)

Or Customize: If you enjoy shaping every detail, you can select each design element individually – starting with either the Traditional or Modern collection, then choosing your preferred front, interior panels and log set to create a look that's uniquely yours. (Pages 6-7)

Controls

Whether it's the IntelliFire® app that lets you start the fire from your phone (even when you're not home), a sleek touchscreen remote that gives you easy access to flame height and fan speed, or a simple wall switch for quick on-off convenience, there's an option that fits your life.

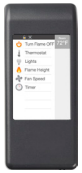

INTELLIFIRE APP

WIRELESS WALL SWITCH

TOUCHSCREEN REMOTE

Technologies

INTELLIFIRE TOUCH® IGNITION SYSTEM

IntelliFire Touch is an advanced intermittent pilot ignition (IPI) system that makes starting and controlling your fireplace simple, safe and reliable. Applies to all control types (app, wall switch and touchscreen remote).

DIRECT VENT TECHNOLOGY

Direct vent fireplaces are sealed systems that pull fresh air from outside and send 100% of combustion exhaust back outdoors. That means no fumes enter your home. The result is efficient heating, better energy use and cleaner indoor air quality.

BATTERY BACK UP

Light your fire with no power! Each model is equipped with a battery backup solution that allows the fireplace to ignite when the power goes out.

Heat Management Solutions

Available on all models.

PASSIVE HEAT™

Disperse heat naturally (no fan) into the room, lowering surface temperatures so you can place a TV or artwork just 12" above the fireplace. Choose side, front or open-wall registers. Mantel required.

Side Register

Front Register

Open-wall Register

HEAT-ZONE® TECHNOLOGY

Draw heat from your fireplace to another room in your home. Redirect up to 50% of the heat, while reducing wall temperatures above the fireplace.

HEAT-OUT® TECHNOLOGY

Draw heat from your fireplace and direct it outside. Redirect up to 40% of the heat while reducing wall temperatures above the fireplace.
